Dierama pulcherrimum  
*aka Angel's Fishing Rod*

# Dierama pulcherrimum

a Future Plants Favorite

Dierama pulcherrimum, also known as angel's fishing rod, has delicate bell-shaped pink to purple flowers, dangling from long stems over long, slender sword-shaped leaves that create an attractive backdrop to the vibrant blooms. This South African plant grows from a corm and does well in sunny areas with fertile, well-drained soil. Dierama flowers from June to August and grows to 140 cm in height (about 4.5 ft tall). Allow space to really appreciate the elegant, arching blooms. Don't let the corms dry out completely in summer heat and you will have a long-lasting garden friend. The foliage stays evergreen through winter in milder climates. Be enchanted by the butterflies and hummingbirds lured to its nectar-rich flowers. Add elegance and charm to your garden with Dierama Pulcherrimum, a fantastic catch!

## Quick Facts

- Unique flower shape
- Use in small groups
- Originates from South-Africa
- Blooms: June to August
- Height: 4.5 ft. (140 cm.)
- Soil: well drained soil
- Zones: 3 to 9
- Exposure: sun, part shade

Geranium phaeum  
'Joseph Green'

# Geranium phaeum 'Joseph Green'

a Future Plants Favorite

Discover the enchanting beauty of Geranium phaeum 'Joseph Green', a true perennial gem that stands out with its distinctive double purple flowers. What makes this geranium even more special is the story of its discovery, a tribute to horticultural passion and family heritage. This remarkable geranium was discovered by Lynne Edwards, who found it in 2013 as a chance seedling in her own garden. It originated from Geranium phaeum plants her father, Joseph Green, had given her over the years. Being a devoted horticulturist, he had lovingly warned Lynne that some of the geraniums he shared might self-seed. Experience the magic of Geranium phaeum 'Joseph Green' and celebrate the beauty of nature intertwined with the love of family and the passion for horticulture.
